EBTECH Conex Box (EB-Conex) Modification

Ebtech customizes Conex box base units to customers' specifications (EB-Conex). Our base platforms include 20' and 40' freight containers that are converted into single or multipurpose units. Ebtech sandwich systems are used to achieving customer requirements whether they are insulation, climate control or ballistic and blast mitigation driven. Ebtech provides durable, economical, and attractive modular designs for industrial, military and emergency housing solutions.

Applications include

- Modular prefabricated Green building systems
- Office buildings
- Portable, construction site offices
- Sleeping quarters, portable shower/toilet units
- Specialized storage units
- Mobile manufacturing process containers
- Mobile data and communication centers
- Remote power stations
- Refrigerated containers
- Heat resistant containers (more than 2000 °F) with a fire rating >3 hours
- Shelters
- Emergency disaster relief units
- EMI/RFI shielded containers
- Units with blast and ballistic protection
- Military units for a variety of rapidly deployable, customizable systems

Benefits

- Excellent structural properties, rugged and weather tight
- Design flexibility
- Comprehensive range of interior modular sandwich panel configurations
- Wide selection of R-values
- Built-in electrical chase
- Ideal for Green building projects
- Factory warranty
