

# **EBTECH QUIET PANELS**

Soundproof Wall Technologies

## **Ebtech Quiet Panel Sound Rooms.**

**Reducing and managing unwanted sound to keep your workers safe and comfortable.**

### ***EbFact:***

*OSHA requires facilities with noise levels above 90 decibels to minimize working time in affected areas and to provide ear plug protection for workers. Ebtech Quiet Panel technology can help to reduce sound dosage and maximize productivity.*

### **Turn down the volume**

Whether it's a quiet, comfortable office or protecting your workers from harmful noise, Ebtech's Quiet Panel Sound Rooms are a great way to solve noise problems fast.

Ebtech's expertly engineered panels can be easily laminated with a sound damping material to reduce overall noise levels in your facility.

Flexible, cost-effective and quickly installed, Ebtech's modular products are custom engineered to accommodate your specific scenerio. Contact Ebtech to discuss the exact details of your application.

### **Features**

- **A single layer of Ebtech's sound dampening laminate is (acoustically) equivalent to 8 sheets of standard drywall**
- **Environmentally friendly, lab tested.**
- **Fire and UL rated (depending on model)**
- **Small, internal modular rooms can often be built without permits.**
- **10 Year Warranty**
- **Faster depreciation and other added tax benefits.**
